

## JUMO DELOS SI

### Precision pressure transmitter with switching contacts and display

#### Application

- Food & pharma
- CIP/SIP systems
- Machine and system construction
- Air conditioning and refrigeration system construction

#### Brief description

The JUMO DELOS SI high-precision, electronic pressure switch with analog output meets technical requirements relevant to hygiene. In a readily cleanable design and with a front-flush, seal-free measuring system, it is specifically geared to hygienic process safety standards. The nominal measuring ranges set at the factory extend from 400 mbar to 60 bar. They can be rescaled in the ratio 1:4, allowing the user to perform several measurement tasks with just one measuring instrument.

The following output variants are available, depending on the application: 1x PNP or 2x PNP switching outputs or 1x PNP switching output and an analog output signal.

The process pressure is visualized by a large, positively lit LC display.

Configuration can simply be performed on the measuring instrument, or by using the more convenient setup program. The enclosure can be rotated  $\pm 160^\circ$  to make it easier to read, and the display can be rotated  $180^\circ$  for overhead mounting.

A high-temperature variant is available for hot media up to 200 °C (CIP and SIP cleaning systems).

Type 405052

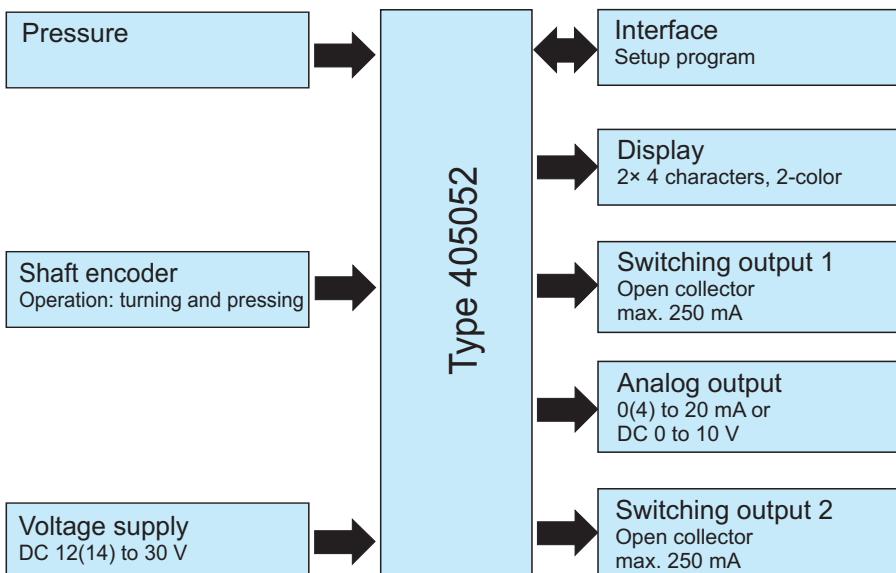

#### Customer benefits

- Process safety**  
An hygienic design, with parts in contact with the medium made from stainless steel. The system has no dead zones, which prevents microbial contamination and ensures maximum process safety for hygienic processes.
- Uncomplicated and time-saving**  
Save time with easy, local measuring instrument configuration or configuration via a more convenient setup program.
- Flexible**  
The enclosure can be turned  $\pm 160^\circ$  and the display rotated  $180^\circ$  for user-friendly and individual alignment of the measuring instrument for optimum readability, configuration and electrical installation in any mounting position, as well as for running an auto-zero function.

#### Special features

- Linearity from 0.1 % of MSP (measuring span)
- Scaling of measuring range 1:4
- Large, brilliant two-color display with alarm function
- Time-saving and simple configuration on the instrument or via a more convenient setup program
- Flexible mounting variance by rotating the display ( $180^\circ$ ), followed by auto zeroing
- Enclosure can be turned ( $\pm 160^\circ$ ) to improve readability
- Option for increased medium temperature up to 200 °C (SIP and CIP capability)
